IBM.

Job Application for Software Engineer

Dear Recipient,

About Me

Hello, I'm Si Chen, a graduate student from computer science department. During my PhD study, I'm working as a Software Engineer developing smartphone sensing system and mobile security framework. I'm very excited to have an opportunity working as a Software Engineer in IBM.

Why IBM?

I strongly believe I will be a good fit for this early-career engineer's position due to the following reasons:

- I have a solid background on both computer science and electrical engineering.
- I'm good at programming and have the ability for fast prototyping.
- I keep myself continuously learning new knowledge to enrich my capability.
- I pursue a work environment fills up with creative colleagues and innovative ideas. IBM is able to offer me such an ideal career future.

Why Me?

As working in IBM, I can apply all my experiences to help you in developing robust system. I welcome the opportunity to discuss how my skills and experiences would contribute to IBM. Please feel free to contact me if you have any questions or require additional information.

Sincerely,

Si Chen
